Re: Transfer of Permit
NPDES Permit No. TN0074071
Airshaft Hollow Sewage Treatment Plant
Briceville, Anderson County, Tennessee

Dear Mr. West:

As of January 1, 2009 the Anderson County Utility Board merged with the North Anderson County Utility District to form the Anderson County Water Authority.

In November, 2008 your department issued a NPDES permit to the North Anderson County Utility District with an expiration date of October 31, 2013 for the above referenced sewage treatment plant. The plant is authorized to discharge treated domestic wastewater to Statestone Creek at Mile 1.50.

We respectfully request that you initiate proper steps with your department to transfer the existing permit into the correct name of the Anderson County Water Authority. Furthermore, we request that you transmit all future correspondence concerning the facility to our address at ACWA, 1611 North Charles Seivers Boulevard, Clinton, TN 37716.

If you have comments or questions, please advise.

Sincerely Yours,

Larry D. Clowers
General Manager
